**Stopper Assembly Kit**

- Allen Wrenches
- Stopper

Packed in the leg pulley accessory kit.
6. Slide the Glideboard towards the bottom of unit as shown in Figure 6.

7. With caution, to avoid pinched fingers or hands, grab the top of the Glideboard and slowly pull the unit up allowing the Tube Rollers to bring the back of the unit towards the center. Keep approximately 12" apart.

8. Continue to fold the exerciser together until it is completely folded and roll the exerciser into a closet for storage. To store under a bed, simply lower the exerciser to the floor and roll under the bed. Do not store unit in upright position when folded.

**WARNING**

CRUSH HAZARD, KEEP HANDS CLEAR DURING FOLDING.

---

**TO REMOVE THE GLIDEBOARD**

You can also remove the Glideboard if you need to fit the exerciser under a narrow space (between 6" and 8").

**IMPORTANT:** The Glideboard weighs approximately 15 lbs. Use caution when lifting it off of the exerciser. Lifting incorrectly may result in user injury.

1. With unit laying flat on the floor, disconnect the Pulley from the hook on the underside of the Glideboard.

2. Tilt up the Glideboard and slide it off the Rails. When the Glideboard is completely off, set it aside (see Fig. 1).

3. Pull the Spring Loaded Pin to release the Rail and fold the unit together as shown above in Figure 7 & 8. Be sure you release the Spring Loaded Pin before folding.

---

**Congratulations on purchasing your new Total Gym® Gold Plus exerciser.**

With this product in your home, you have everything you need to start your own workout program, to tone and strengthen the important muscle groups of your upper and lower body. This is vital for all of us, regardless of age, sex, or fitness level, and regardless of whether your primary goal is body sculpting, weight loss, health maintenance, or more energy for daily activities.

Strength training not only tones and conditions the muscles we use every day to stand, walk, lift, and turn; it can actually transform our body composition. By reducing body fat and increasing the proportion of lean muscle in our bodies, strength training can effectively turn up our metabolic thermostat, so that we burn calories all the time, no matter what we're doing.

It's easy - all you have to do is spend 15 to 20 minutes a day, 3 to 4 days per week on your Total Gym® exerciser to start realizing the benefits.

Be sure to read through this Owner's Manual carefully. It is the authoritative source of information about your Total Gym® Gold Plus exerciser.

If you have questions about your Total Gym® Gold Plus exerciser, please call Customer Service at 1-800-303-7896, Monday through Friday, 8:30am to 5:00pm, EST.

**ORDERING REPLACEMENT PARTS**

When ordering parts, please contact our Parts Department, toll free at 1-800-303-7896 Monday through Friday, 8:30am to 5:00pm, EST.

**IMPORTANT:** You must have your serial number and this manual ready when calling for parts.

Serial #: __________

Please also provide the following information:

1) Name, Mailing Address and Telephone Number
2) Date of Purchase
3) Where Product was Purchased (Name of Retail Store, City)
4) Model Number
5) Part Order Number and Description

SAFETY INSTRUCTIONS

Before beginning this or any exercise program, consult a physician or health professional, who can assist you in planning a program appropriate for your age and physical condition. This is especially important if you are over age 35 or have pre-existing health problems.

Do not overexert yourself. Stop exercising immediately and consult your doctor if you experience pain or tightness in your chest, irregular heart beat, shortness of breath, or if you feel faint, nauseous, or dizzy.

This product is designed for home use only. It is not intended for commercial or institutional use. Use only as instructed. Do not stand on the product.

The Total Gym® exerciser is not intended for use by children. Keep this and all fitness equipment out of the reach of children.

Keep fingers, loose clothing, and hair away from moving parts.

Inspect your exerciser before each use to ensure proper operation. Do not use this equipment unless all moving parts, including cables and pulleys, are working properly. See pages 11 & 12 for details on Inspection, Maintenance and Storage.

The exerciser should only be used on a mat or carpeted surface to prevent unexpected movement of the unit. Use only the accessory items recommended by the manufacturer.

To avoid serious injury, care should be taken at all times when getting on and off this or any exercise equipment.
STARTING OUT

Wear athletic shoes and comfortable light clothing when exercising on the Total Gym® Gold Plus exerciser. Do not exercise barefoot. Check your exerciser before using to ensure that all the parts are in place and working properly (see pages 11 & 12 for details on Inspection, Maintenance and Storage).

Adult supervision is required at all times.

NOTE: The Rails and Glideboard can be raised to any desired level on the Vertical Column depending upon your degree of fitness. Please note, however, that the Rails cannot be raised to the highest position on the Vertical Column when the Leg Pulley Bracket is attached to the column. Be sure you have plenty of free space around the exerciser so that performing on the Total Gym® exerciser, as well as getting on and off, is convenient and safe.

Each time you raise or lower the Height Adjustment Assembly, be sure you hold it to keep it from dropping to the floor.

Begin using the product at a low incline. As your fitness level progresses, increase the incline to increase the intensity and improve your muscle strength. Don’t be in a hurry to exercise at a high intensity level; start out easily and build gradually. The Total Gym exerciser is as easy as 1-2-3 to use, so read on.

1. Important Things to Remember When Using the Total Gym® exerciser
   - Always have control of the Glideboard before getting on and off the exerciser.
   - Keep your feet on the floor when getting on and off the exerciser. Only remove them from the floor for the duration of the exercise.
   - If you are using the Handles, hold onto them as you get on and off the Glideboard.

2. Exercising with the Handles Only
   Grasp the Handles which are attached to the Cable Assembly and slide the Glideboard to a position in which you can comfortably sit or lay down when performing the desired exercise (see your Exercise Book). Be sure to keep your feet on the floor until you are in the correct position for the specific exercise. Then, if the exercise calls for your feet to be off the floor, place your feet as specified in the instructions.

3. Exercising with the Wing Attachment Only
   Slide the Glideboard to a position in which you can comfortably sit or lay down on when performing the desired exercise (see your Exercise Book). Keep your feet on the ground until you are in the correct position and feel comfortable. Then, place your feet in the proper position and begin to exercise.

When starting your exercise program, begin with the basic exercises shown in the Exercise Book included with your Total Gym® exerciser to familiarize yourself with the movements. Use the lowest incline level to start with—you can work up to a higher incline level in the weeks and months to come.

For the specific Total Gym® Gold Plus exercises and programs, study and follow the instructions in the Exercise Book included with your product.

PRODUCT SPECIFICATIONS

| LENGTH: folded 51” in use 91.5” | WIDTH: 16” |
| WEIGHT: 61 lbs. | MAXIMUM USER WEIGHT: 275 lbs. |

**SET UP**

Your product comes with:

- "C" Pin located at the bottom of the Vertical Column, which must be removed prior to unfolding.
- "C" Pin with Lanyard that is attached to the Height Adjustment Assembly Bracket.
- One Spring Loaded Pin located in the Leg Pulley Accessory Kit as well as two M8 x 80mm Hitch Pins for the Wing Attachment and two M8 x 60mm Hitch Pins for the Ab Crunch Boards.

**IMPORTANT:** To Prevent Injury – Be sure the Spring Loaded Pin is locked securely into place in the Left Rail before using unit. This will prevent the Vertical Column from falling forward.

1. Pull the product out of the shipping box. Remove all packaging materials, including tape and cardboard inserts, from your unit.

2. Lay product on the floor with Glideboard side up. Make sure you have plenty of space on both ends of the product. Slide the Glideboard as far as it will go towards the Front Crossbar before you begin lifting unit.

3. Lift the exerciser up by holding it at the top of the Rails. Using your foot, slowly spread the unit open at the bottom approximately 12 inches so that it rests firmly on the Front and Back Crossbars not allowing it to go too far.

4. Make sure the Handles are out to the sides before you begin to unfold your unit. Keep hands and fingers away from Pulley. Hold onto the top center of Glideboard and begin rolling Tube Rollers. Spread the unit out until it is flat on the floor. Be careful to do this slowly. Be sure to support the frame in the center to avoid having the product drop suddenly onto the floor or pinch fingers.

5. (a) Remove "C" Pin from bottom of Vertical Column. Remove plastic packing ties from the top and bottom of the Vertical Column. Pull out the Spring Loaded Pin located on the Height Adjustment Assembly to release Spring Loaded Pin. Continue to hold pin out while performing the next step.

**HOW TO ATTACH THE LEG PULLEY ACCESSORY KIT**

1. Connect the Leg Pulley Bracket to the top of the Vertical Column by aligning Bracket with the hole at the top of the column. (Be sure Bracket is right side up.) Insert M8 x 80mm Hitch Pin through the hole to secure Bracket onto the Vertical Column (see Fig. 1).

2. Detach the Cable Assembly from the loop on the underside of the Glideboard and attach one of the Clips from the Leg Pulley Assembly.

3. Place D-Ring on Pulley first. Then connect the D-Ring to the Bracket as shown (see Fig. 2).

**NOTE:** If Rope appears to be twisted, take D-Ring off and turn Pulley around.

4. Attach the Foot Harness to one of your feet by placing your foot in the Harness so the sewn-in-ring is on the bottom of your foot. Pull tightly on the belt so the Harness is secure (see Fig. 3).

5. (a) Position yourself on the Glideboard correctly for the specific exercise you want to perform.

(b) While lying down on the Glideboard, connect the Clip on the end of the Rope to an O-Ring on the Harness attached to your foot (see Fig 4). Depending on the exercise you are performing, connect the Clip to the proper O-Ring. Be sure to always stabilize the Glideboard when clipping the Harness on or off. Also, use caution when getting on or off the Glideboard. You are now ready to exercise using the Leg Pulley Accessory. See your Exercise Book for specific exercises that utilize the Leg Pulley Accessory.

**NOTE:** Remove Leg Pulley Bracket when you are not exercising with it.

(c) To disconnect the Harness, unclip the Rope from the O-Ring on the Harness. Be sure to stabilize Glideboard when disconnecting Foot Harness.
HOW TO ATTACH THE AB CRUNCH BOARDS

1. Be sure to give enough clearance so your head does not hit the Vertical Column when performing these exercises. DO NOT attach the Ab Crunch Boards to the Rails on the holes that are closest to the Vertical Column, doing so could result in possible serious injury or death.

2. Remove Leg Attachment Bracket when using the Ab Crunch Boards to avoid contact, which could result in possible serious injury or death.

3. Be sure that the Hitch Pins are securely locked in place before using the Ab Crunch Boards. Failure to do so may cause the Ab Crunch Boards to fall off resulting in possible serious injury or death.

4. Do not move your body to the extreme left or right when using the Ab Crunch Boards to avoid falling off the exerciser, which could result in possible serious injury or death.

5. Caution should be used when getting on and off the exerciser when the Ab Crunch Boards are in place. Failure to do so could result in possible serious injury or death.

ASSEMBLY

1. Remove Hex Bolts and Washers from bottom of Ab Boards.
2. With the small end of the Ab Board closest to you, securely attach the appropriate Handle with 4 Flat Washers, Spring Washers and Hex Bolts with Hex Wrench provided. See Fig 1.
3. Repeat on 2nd Ab Board.

INSTALLATION - How to Install the Ab Crunch Boards to your Total Gym® exerciser.

1. Locate the 3 holes at the top of the Right and Left Rails on the Vertical Column (see Fig. 2a). DO NOT use hole closest to the Vertical Column. Your head could come in contact with the Vertical Column and could result in possible serious injury or death.

Choose the 2nd or 3rd hole depending on your height or comfort level.

2. Install the Ab Board labeled (L) onto the Left side Rail with the Handle facing toward the Vertical Column (see Fig 2b).

3. Insert the M8 x 60mm Hitch Pin through the holes on the Attachment Brackets and through the hole on the Left Rail as indicated by arrow.

4. Repeat for right Ab Board.

NOTE: Remove Ab Crunch Boards from frame when not required for the specific exercises.

(b) Take hold of the Vertical Column and pull it up until it is upright. Release the Spring Loaded Pin. You should hear it lock back into place.

IMPORTANT: Be sure the Spring Loaded Pin is locked into place before using your unit. You will know the pin is locked into place when you can see the end protrude through the inside of the Rail Bracket.

6. (a) Position one foot on Back Crossbar to keep the product from lifting off the floor. With one hand on either the Right or Left Rail and the other hand holding the “C” Pin with Lanyard, slide the Rails along the Vertical Column to desired position.

(b) Then insert “C” Pin with Lanyard (attached to the Height Adjustment Bracket) into the hole on Vertical Column.

(c) The “C” Pin with Lanyard will lock into place.

Never sit on or exercise on the unit without the “C” Pin with Lanyard securely locked into place.

7. Insert “C” Pin in the side hole located at the bottom of the Vertical Column. (This is the pin you removed in step 5a).

8. STOPPER ASSEMBLY

If the Stopper at the bottom of the Vertical Column has not already been installed, please do so now. Locate the Stopper which is packed in the Leg Pulley Accessory Kit (See Product Specifications on page 3 of this manual). Unscrew Nut on the end of the Stopper and remove. Insert the Stopper into the hole located in the center of the Back Crossbar (see Fig 1). Screw the Nut back onto the Stopper and tighten with Allen Wrenches provided (see Fig 2).

IMPORTANT: Proper installation of the Stopper is necessary for the Tube Rollers to function easily when the unit is folded and rolled into place for storage.
HOW TO ATTACH THE WING ATTACHMENT

The Wing Attachment provided with your unit has been uniquely designed to serve several purposes. It can be placed at the top or bottom of the exerciser and angled toward you or away from you depending upon what is comfortable for you.

Two thick Foam Pads are provided with the Wing Attachment. They must be attached to the Wing Attachment (if not already) before exercising. To do this:
1. Simply wet each end of the straight Crossbar with soapy water.
2. Attach Foam Pads on the straight Crossbar as shown in Figure 1. Let dry before beginning to exercise with the Wing Attachment.

Proper ways to use the Wing Attachment in accordance with the exercises you wish to do:

PULL UPS
1. Locate the holes at the top of the Right and Left Rails on the column end of the unit.
2. With the Wing Attachment angled toward the Glideboard, line up the Brackets on the Wing Attachment with the desired position holes on the Rails.
3. Insert the 2 M8 x 80mm Hitch Pins through the holes on the Wing Attachment Brackets and the hole on the Rails, as shown in Figure 2.
4. You are now ready to perform pull up and chin up exercises to work the arms, lats and back. See your Exercise Book for specific exercises.

LEG PULL: CRUNCHES, LEGS AND SIT UPS
1. Locate the holes at the top of the Right and Left Rails on the column end of the unit.
2. With the Wing Attachment angled away from the Glideboard, line up the Brackets on the Wing Attachment with the desired position holes on the Rails.
3. Insert the 2 M8 x 80mm Hitch Pins through the holes on the Wing Attachment Brackets and the hole on the Rails, as shown in Figure 3.
4. You are now ready to perform leg pulls, crunches and sit up exercises to work the abdominals, waist and legs. See your Exercise Book for specific exercises.

FRONT PRESS
1. Locate the holes at the bottom of the Right and Left Rails near the Front Crossbar.
2. With the Wing Attachment toward the Glideboard, line up the Brackets on the Wing Attachment with the desired position holes on the Rails.
3. Insert the 2 M8 x 80mm Hitch Pins through the holes on the Wing Attachment Brackets and the hole on the Rails, as shown in Figure 4.
4. You are now ready to perform the front press which works the upper chest and triceps. See your Exercise Book for specific exercises.

SQUATS
1. Locate the holes at the bottom of the Right and Left Rails near the Front Crossbar.
2. With the Wing Attachment angled away from the Glideboard, line up the Brackets on the Wing Attachment with the desired position holes on the Rails.
3. Insert the 2 M8 x 80mm Hitch Pins through the holes on the Wing Attachment Brackets and the hole on the Rails, as shown in Figure 5.
4. You are now ready to perform the front press which works the thighs and calves. See your Exercise Book for specific exercises.

NOTE: When performing the squat exercises, be sure to position your hands on the side of the Glideboard, NOT along the bottom of the Glideboard in order to avoid pinched fingers.

NOTE: Remove Wing Attachment from frame when not required for the specific exercises.

PILATES BAR ASSEMBLY
Assemble the Pilates Bar at the opposite end of the unit by inserting it into the Front Crossbar as shown in Figure 6. Make sure it is fully inserted.
